

HETTICH PLC YOUR SWISS PARTNER FOR

- Centrifuges
- Incubators (with or without Co₂)
- Evaporators (Vacuum concentrators)
- Heating ovens/Drying ovens/Climate chambers / Vacuum ovens
- Waterbaths
- Laboratory/pharmaceutical/medicine/blood bank refrigerators
- Laboratory/plasma freezers/ultra-low freezers/blood bank refrigerators
- Blood bag thawing systems/Platelet agitators
- Transport boxes/transport systems
- Innovative laboratory instruments

EN ISO 9001
EN ISO 13485
CERTIFIED COMPANY

We distribute and provide service for the following brands:

hettich.ch

HETTICH PLC

MORE THAN 40 YEARS OF EXPERIENCE

BENEFIT FROM OUR KNOW-HOW

- Own production of evaporators and the cell washing centrifuges
- Company headquarters in Bäch, Switzerland
- Branch in canton VD, Switzerland
- 20 employees and trainees in administration
- User-specific advice from product specialists
- Maintenance and repairs
- Qualifications (IQ/OQ)
- Transport, including commissioning and instruction of the equipment

LONGEVITY

Once purchased, the equipment remains with you – ten years on average, in individual cases much longer.

This distributes your acquisition costs over many years.

RELIABILITY

Carefully manufactured from high-quality components and materials, our devices are robust and accomplish their long service without any problem. We guarantee fast order handling and expert advice.

Strong in customer service. Large stock of spare parts.

SUSTAINABILITY

By purchasing a product, you are choosing a company that assumes responsibility.

Invest in quality.

SAFETY

Strictly controlled and certified, they guarantee a uniform quality and safety level throughout Europe. Regardless of whether you need in vitro diagnostics or a medical device, our range includes approved devices for you.

We are certified to ISO 9001 and ISO 13485.

HETTICH PLC CUSTOMER SERVICE

OUR SERVICE GUARANTEES HIGHEST AVAILABILITY AND MAXIMUM LIFETIME OF YOUR EQUIPMENT

- Top qualified service technicians with many years of experience
- Original spare parts warehouse with high availability
- 90% of the repairs can be completed on site during the first service visit
- Measuring instruments with calibration certificate
(Homepage: Service\Measuring instruments)
- Maintenance/qualifications according to customer needs

REGULAR MAINTENANCE AND INSPECTION OF YOUR EQUIPMENT

The maintenance contract offers the following advantages:

- Proactive scheduling of your maintenance
- Regular maintenance can increase the lifetime of your device
- Reduction of your expenses / downtime
- Maintenance certificate as proof
- Downtimes of the devices are reduced during repair
- Travel and working time included in flat rate

Our team is at your service for commissioning incl. IQ / OQ, instructions, maintenance, repairs and qualifications.

HETTICH PLC

Products from our own production

CELL WASHING CENTRIFUGES

We produce the „ROTOLAVIT II“ cell washing centrifuge in the form of a final assembly. It facilitates the daily routine in the laboratories of transfusion facilities. In addition to cross-matching it is also used for antibody search and differentiation, for example, as well as for washing cells in TB tests. Up to 20 different processes can be programmed quickly and easily via the modern Touchscreen. The centrifuge takes up very little space, delivers reliable results and is extremely user-friendly with very low consumption costs.

EVAPORATORS (Vacuum concentrators)

We have been producing innovative and reliable evaporators for more than 10 years. We offer them optionally suitable for robots („CombiDancer II“, „DancerPlus“ as well as the corresponding Chiller).

Vacuum allow concentrators evaporate excess solvents during sample preparation. They samples to be processed quickly, flexibly, reproducibly, gently and in an environmentally friendly way. This makes them ideal for use in solid phase extraction, analytical laboratories, combinatorial chemistry or high throughput screening. Hettich evaporators provide you with considerably faster results than vacuum centrifuges.

HETTICH PLC

Our sales products

CENTRIFUGES

The right centrifuge for every application.

All Hettich devices are produced by Andreas Hettich GmbH & Co. KG in Tuttlingen (DE). The right centrifuge for every application. Hettich offers a large selection of high-quality tabletop centrifuges, underbench centrifuges and standalone centrifuges as well as automatic centrifuges (robotic series). In co-operation with users from medicine, chemistry, research and industry, centrifuges and accessories are developed and adapted to the latest requirements in a continuous process.

Hettich centrifuges are very reliable, user-friendly, made from high-quality materials, durable and therefore cheaper to maintain than competitive products.

INCUBATORS

„HettCube“ incubators and cooled incubators

The Hettich incubator series is environmentally friendly, economical and well-designed. Your cultures benefit from the best possible growing conditions.

All advantages at a glance:

- Touchscreen with intuitive operation
- Simple weekly programming, flexible setting options
- Process reliability even during power failure
- Largest usable space on the smallest footprint
- Temperature control system reduces drying out of samples
- Cost reduction with energy saving
- Extensive standard equipment
- Suitable accessories available for the respective application

We offer a 2-year full warranty on Hettich products.

HETTICH PLC

Our sales products

MEMMERT TEMPERATURE CONTROL CABINETS AND WATER BATHS

The right cabinet for your application.

Already in its third generation, Memmert develops and produces temperature control cabinets (heating / drying / incubator / climate chambers) as well as water baths for a wide range of applications at two locations in southern Germany:

- Industrial material and component testing
- Biological, chemical or food technology research
- Human and veterinary medicine
- Diverse quality tests in demanding manufacturing processes

Memmert is strong in special construction, on your request we will construct a device especially according to your wishes. Memmert products are used in more than 190 countries, this makes Memmert to one of the leading suppliers of temperature control appliances worldwide.

Hettich AG has been selling Memmert products and services for more than 20 years. Due to the close and long-standing co-operation and the correspondingly extensive know-how of our employees, we are your partner for purchases as well as for maintenance and repairs.

We offer a 3-year full warranty on Memmert cabinets.

HETTICH PLC

Our sales products

B MEDICAL SYSTEMS

The products of B Medical are suitable for ensuring the prescribed cooling chain during the storage and transport of vital and temperature-sensitive preparations in terms of quality and legal compliance. B Medical Systems (formerly Dometic), from Luxembourg, are experts in the field of special cooling of temperature-sensitive preparations.

All advantages at a glance:

- Safe storage of the preparations
- Integrated multifunction control electronics
- Corrosion-resistant products
- High-quality materials
- Simple operation and cleaning

B Medical Systems exports reliable refrigeration and freezer equipment as well as transport boxes for vaccines, blood and blood components, laboratory and pharmaceutical products around the world. We are the exclusive distributor of B Medical products in Switzerland.

We offer a 2-year full warranty on B Medical Systems devices.

HELMER

„Helmer Scientific“ offers industry-leading laboratory products for storage and processing of biological material. These high-quality products provide innovative product solutions for hospital laboratories, pharmacies, clinics, health departments and research facilities. The headquarters are located in Noblesville, Indiana (USA). The platelet storage systems and plasma thawing devices, in particular, are in high demand in Switzerland and exclusively distributed by us.

We offer a 2-years full warranty on Helmer devices.

DELTA T

Whether frozen fresh plasma, whole blood, platelet concentrates or red blood cell concentrates – the passive transport solutions from „delta T“ cover the entire transport logistics and are easy to use. These practical solutions are designed for blood banks, clinics and blood donation services and are manufactured in Germany.
